

Automated wire termination

- Automating the termination of wire gauges from 20awg to 56awg
- Soldering to IPC CLASS I,II, III
- Exceeds all Ionic contamination spec's
- RoHs compliant
- Automation speeds up to 6 seconds per conductor, zero location errors
- No human operator variables, whole process is automated, eliminates all scrap
- No limitations in the connector design requirements
- All connector types can be retrofitted for automation
- ISO-13485, ISO-9001, ITAR registered
